Dagger2, Dagger Hilt

REST API, GraphQL

Push notification (Firebase + GetStream)

Unit testing

SOLID Principles

Firebase

Profile

Energetic and motivated Android Developer with 3+ years of experience in Android. I'm looking for a position where I can use my skills effectively. I 'm very experienced in Android Development using MVVM + Clean Architecture + Dagger Hilt and I have strong knowledge with OOP, SharedPreferences, DataStore, SQLite, Room, Firebase, Rest API, GraphQL, Notifications, Work Manager, I/O Files, etc. Making reusable codes and taking care about the performance.

Collaborating & working with the team is one of my favorite working styles. I can work together with UI / UX designer, Quality Assurance, Lead, COO. As I mentioned, I 'm very passionate about problem solving, coding challenges, and learning the latest technologies. Thus why I can guarantee that I am a forward-thinking android developer who has good ability to work under pressure within deadlines and has good ability to transcribe any UI on Android.

Achievements

- People choice award, Hackathon Yangon 2018 (Dinger)

- Champion of ICPC 2019 (regional & national)

Experience

Android Developer   *Jun 2022 - Present*
Better Hr, Yangon

I am currently working as an Android developer at BetterHr, a HR software company which maintains their code quality, updates their features every week, and takes care about bugs immediately as soon as possible. During this time, I am the only one who has full responsibility to maintain code, modify & make features, replace deprecated libraries & codes, take care about bugs, and take care about Git Flows. The core features that I maintained and fixed mostly are chatting, location, attendance calculation, QR scanning, customized push notification, and both minor & major UI improvements.

Other Skills

- ❖ Flutter
- ❖ Git & GitHub
- ❖ Git Flow
- ❖ DS & Algorithms
- ❖ Problem solving
- ❖ Linux
- ❖ Figma
- ❖ C++

Education

B.C.Sc (Computer Science)

University of computer studied, Yangon

Personal Projects

A Kywe SaYin

Users can manage debt lists locally (offline app). Developed with MVVM architecture + RxJava + Room. And now, version 2 is currently developing by modifying with MVVM + clean architecture + Multi-module + Coroutine flows + Jetpack compose + Room.
